LIGHT IS FASCINATING

It captures and inspires our imagination like few other things can. When we focus light through a prism, we see that it is actually made up of countless colors and hues that together create a vast spectrum of color.

The world of graphic arts is like light. Each artist is unique, with his or her own special set of gifts and talents. When each person adds a particular hue of personality, we experience an extraordinary spectrum. ***The Spectrum of Design.***

To me, photography is an art of observation...

I've found it has little to do with the things you see

and everything to do with the way you see them.

A designer knows he has achieved perfection

not when there is nothing left to add,

but when there is nothing left to take away.

INTERIOR DESIGN

When you're building a room, you're building character

and character is the strength and wisdom of a home.
